

PRESCRIPTION FORMULARY

The formulary is a guide to medicine which may be prescribed by Phoenix Health Solutions Ltd. It is not intended to replace the BNF, and prescribers should refer to the BNF and manufacturer's Summary of Product Characteristics for prescribing information.

The content of this formulary is reviewed on a rolling programme by the Medical Director and lead clinicians. Advice is sought from an appropriate consultant, where specialism is required.

Aim of the Formulary

The aim of this local formulary is to rationalise prescribing in order to promote the safe, effective and economic use of medicinal products.

The formulary provides guidance on the hierarchy of prescribing choices. Consideration should be given to prescribing first line choices where possible.
